

Jeykumar Nagarajan

Databricks & Cloud Data Architect | Mississauga, ON | 647-533-3461 | Jeykumar.nagarajan@gmail.com

Professional Summary

22 years of dedicated data experience across enterprise data warehousing, business intelligence, data lakes, and governance—from on-premise EDW delivery through modern cloud lakehouse platforms. Databricks Certified Data Engineer Professional and Azure Databricks Platform Architect with **7+ years** architecting enterprise lakehouses on Azure and AWS, including medallion design, Unity Catalog governance, multi-tenant platform operations at **750+ workspace** scale, and legacy-to-Delta migrations across petabyte estates.

- **Lakehouse & platform architecture:** Medallion design (Bronze/Silver/Gold), Delta Lake, Unity Catalog, workspace topology, serverless compute, and metadata-driven ELT on Azure and AWS Databricks.
- **Platform engineering & IaC:** Terraform and Terramate for modular, multi-workspace provisioning; Jenkins and GitHub (Enterprise and Cloud) for automated release management and end-to-end CI/CD with governance integrated into IaC.
- **Migration & modernization:** Led SAS, Sybase IQ, Hadoop, Informatica, and Oracle workloads to PySpark and Delta Lake; DBR upgrades through **14.3 LTS**; account-level UC migrations using UCX across hundreds of workspaces.
- **GenAI & observability:** Architected Databricks-native agentic frameworks using AI Gateway, MLflow, MCP, LLM serving endpoints, and Databricks Apps for agent performance, cost, and observability.
- **Leadership:** Trusted advisor to executive and platform stakeholders; led distributed teams of up to 20 and delivered concurrent programs valued up to **\$5M**.

Technical Skills

Category	Skills
Databricks & Lakehouse	Azure/AWS Databricks, Unity Catalog, Delta Lake, PySpark, Spark SQL, Medallion Architecture, serverless compute, Lakeflow Jobs, Databricks Genie, UCX, DBR 13.3–14.3 LTS
GenAI & MLOps	Databricks AI Gateway, MLflow, MCP, LLM serving endpoints, Databricks Apps, agent observability
Cloud Platforms	Azure (ADF, ADLS Gen2, Entra ID, Key Vault), AWS, Event Grid, Event Hub, Apache Kafka
IaC & DevOps	Terraform, Terramate, Jenkins, GitHub Enterprise Server, GitHub Cloud, Azure DevOps, Git, Databricks CLI
Integration & Languages	Python, SQL, REST APIs, Snowflake, Snowpark
Governance & Quality	Access management, audit controls, Collibra, metadata-driven frameworks, data lineage, DQ frameworks
Legacy Sources	Oracle Exadata, SQL Server, Sybase IQ, SAS, Teradata, Hadoop Hive/HDFS/HBase, SAP, Informatica PowerCenter/BDM/EDC/Axon

Experience

Data Pattern Canada | Oct 2020 – Present

Databricks Platform Architect — Multi-Cloud (Azure & AWS)

- Architect Databricks platform estates for enterprise clients via Databricks Professional Services engagements—spanning IaC, CI/CD, governance, modernization, and GenAI platform design.
- Deliver Terraform/Terramate-based workspace provisioning, automated release management, and Unity Catalog governance across multi-tenant environments at **750+ workspace** scale.

Rogers Communications | May 2015 – Oct 2019

Cloud & Big Data Architect

- Established Rogers' hybrid cloud data lake strategy; evaluated Azure Databricks, AWS, GCP, and Snowflake for **200 TB EDW** and **2.5 PB** Hadoop migration paths.
- Built Databricks environments and enterprise governance with Informatica EDC/Axon.

PointClickCare | Oct 2019 – Sep 2020

Senior Data Engineer

- Engineered high-volume ingestion from **1,000+ databases** into Azure Hyperscale; cut critical batch runtime from **36 hours to 15 minutes** via parallelized SQL redesign.

Accenture · iGate · Infosys | Jul 2004 – Apr 2015

Data Architect / Data Warehouse Manager / Senior Engineer

- Led enterprise EDW delivery on Oracle and Teradata using Informatica; built automated data quality frameworks across large relational estates.

Project Highlights

Global Financial Services — Multi-Tenant Platform Governance

Apr 2026 – Present

- Guide deployment, standardization, and governance of a **750-workspace** estate across **3 tenants**, serving **50+ teams** with varied security requirements.
- Mapped **8 Azure metastores** and **~411 workspace relationships** to improve migration planning and platform visibility.
- Designed onboarding for Serverless, Genie, Automatic Identity Management, and platform upgrades; led cost optimization including an **89% egress cost reduction** PoC.
- Track and resolve platform blockers across Terraform constraints and cross-team access dependencies.

Major Canadian Airline — Workspace Modernization Program

Apr 2026 – Present

- Support **12+ workspace** modernization across DBR upgrades, Unity Catalog, serverless adoption, and storage modernization.
- Lead upgrade assessments and migration planning for **DBR 13.3 to 14.3 LTS** using automated, reusable tooling and services.
- Provide executive visibility into progress, blockers, assignment gaps, and customer-side constraints affecting delivery velocity.

Global Retail & Apparel — Databricks Agentic AI Platform

Apr 2026 – Present

- Designed a Databricks-native agentic framework using **AI Gateway**, **MLflow**, **MCP**, LLM serving endpoints, and Databricks Apps.
- Built agent performance monitoring, cost tracking, and observability for production GenAI workloads on the lakehouse platform.

Qualcomm | Semiconductors — AWS Databricks Platform Architecture

Sep 2025 – Apr 2026

- Served as Databricks Platform Architect on AWS—establishing IaC with **Terraform** and **Terramate** for modular, multi-workspace provisioning across business use cases.
- Architected automated release management and end-to-end **Jenkins** CI/CD with code in **GitHub Enterprise Server**; led migration to **GitHub Cloud**.
- Implemented access governance with audit controls fully integrated into Terraform-managed infrastructure.

IT Convergence | AOC Analytics Lakehouse Platform

Aug 2024 – Sep 2025

- Architected medallion lakehouse on Azure Databricks integrating Oracle EBS, CMMS, and SAP sales and procurement data into Delta Lake with Unity Catalog and Entra ID access controls.
- Designed multi-environment workspace topology, compute policies, and Python metadata-driven ELT framework managing hundreds of dynamic Delta tables.
- Evaluated **Databricks Genie** vs. Snowflake Cortex for natural-language data discovery; established Azure DevOps standards for notebook and pipeline delivery.

Circana | Sybase IQ to Delta Lake Migration

Jan 2024 – Jul 2024

- Migrated **13,000 Sybase views** to Delta Lake with automated Python conversion to Spark SQL and ADF-orchestrated refresh pipelines.
- Defined semantic access layers in Databricks and tuned PySpark workloads post-migration under Unity Catalog and AAD group policies.

Circana | Unity Catalog Account Migration

Aug 2023 – Dec 2023

- Led account-level Unity Catalog rollout across **30 workspaces** using UCX for automated assessment and migration of metastores, clusters, and permissions.
- Upgraded Databricks runtimes from **10.4 to 12.2 and 13.3**; remediated init scripts, RDD patterns, UDFs, and DBFS dependencies for UC compliance.

Circana | SAS to Databricks Lakehouse

Nov 2022 – Aug 2023

- Architected secure Azure lakehouse (Databricks, ADF, ADLS Gen2, Key Vault, Event Grid) and unified Python data-access library across on-prem Sybase IQ, SQL Server, Oracle, and Delta Lake.
- Migrated SAS libraries, permissions, and metadata into managed Delta tables across **30 workspaces** with Azure DevOps CI/CD via Databricks CLI and REST APIs.
- Reduced cloud spend through cluster autoscaling and PySpark tuning informed by Spark UI and Ganglia metrics.

Rogers Sports & Media | Audience Reporting Lakehouse

Nov 2020 – Oct 2022

- Built generic ingestion framework loading structured and semi-structured sources (Hive/HDFS, S3, ADLS, APIs, SFTP) into **Delta Lake** for 360° customer profiles.
- Provisioned multi-workspace Databricks access for **20 business teams** with high-concurrency clusters, credential passthrough, and table access controls.
- Designed Python DQ and operational control frameworks auditing thousands of daily pipeline runs; planned migration of **4,000 datasets** from Domo to Databricks.

Rogers Communications | Enterprise Data Lake Strategy

Feb 2017 – Oct 2019

- Defined hybrid lakehouse roadmap and real-time Bronze/Silver ingestion architecture using GoldenGate and Kafka for cloud-bound **200 TB** EDW and **2.5 PB** Hadoop estates.
- Ran hands-on PoCs across Azure Databricks and multi-cloud services to validate migration logistics and workload placement.

Informatica, Hadoop & Legacy EDW Foundation

Deep legacy platform experience that informs Databricks migration assessments, workload mapping, and cutover planning.

Rogers Communications | Enterprise Data Warehouse & Big Data Operations

Apr 2015 – Jan 2017

- Administered a **120-node Hortonworks HDP** cluster (**2.5+ PB**) supporting **120+ pipelines** across web logs, IoT, CDRs, and relational sources.
- Oversaw Informatica Big Data Management (BDM) capacity planning and deployed Informatica EDC/Axon data catalogs and lineage for enterprise governance.
- Designed near-real-time ingestion using Oracle GoldenGate into Apache HBase with micro-batch Spark jobs syncing to Hive—reducing dashboard refresh from **daily to every 45 minutes**.

Accenture · iGate · Infosys | Enterprise EDW Delivery

Jul 2004 – Apr 2015

- Led Informatica PowerCenter ETL delivery for Cegedim 360 and GE Fleet enterprise data warehouses on Oracle and Teradata.
- Built automated UNIX shell-script data quality frameworks validating correctness and integrity across thousands of relational tables.
- Executed large-scale migrations and modernization paths later applied to lakehouse programs: **Oracle Exadata & Informatica → Azure/Snowflake/Databricks, Hadoop Hive/HDFS → ADLS/Databricks** (Kafka, ADF), and **Teradata → Oracle Exadata**.

Education

Bachelor of Engineering, Computer Science — Bharathiar University, India | 2000–2004 | First Class with Distinction

Certifications

- **Databricks Certified Data Engineer Professional**
- **Academy Accreditation: Azure Databricks Platform Architect**
- Snowflake Hands-On Essentials: Data Warehousing Workshop
